

PRAY | SOLAR WELL FOR PROJECTS

Solar wells often serve two essential functions: They provide access

to life-saving clean water in remote locations and, if there are enough homes and businesses nearby, they can operate as a micro-utility, bringing safe water and much-needed income to the community. The Mozambique Initiative has been leading the way in building solar wells. These wells pump water into a holding tank, and then, through a metered system, local residents may pay to have the water piped to their house. Not only do people in these areas benefit from clean, safe water, they help assure others have clean water by paying for the maintenance of the system. This is transformation of the body!

Pray for all people in Mozambique where:

- Only 42% of the population has access to safe water
- 55 children die per day because of water borne illnesses

PRAYER

God, we pray that every person in Mozambique will be able to have clean, safe water piped into their homes. We recognize that far too often we take the gift of water for granted. Awaken us to the reality lived by so many and incite us to action. Please use us to continue to bring health and healing to communities. Amen.
